The definitive guide to managing a luxury brand, newly revised and updated What defines a luxury brand? Traditional wisdom suggests that it's one that's selective and exclusive—to such a degree that only one brand can exist within each retail category (automobiles, fragrances, cosmetics, etc.). But this definition is inherently restrictive, failing to take into account the way in which luxury brands today are increasingly identified as such by their placement in stores and how consumers perceive them. This revised and updated edition of *Luxury Brand Management*, the first comprehensive book on luxury brand management, looks at the world of branding today. Written by two renowned insiders, the book builds on this new, broader definition of luxury and examines more than 450 internationally known brands from a wide range of industries. Packed with new information covering the financial crisis's impact on luxury brands, and looking towards a new period of growth, the book reconciles management, marketing, and creation with real-life examples and management tools that the authors have successfully used in their professional careers. Includes dedicated chapters focusing on each of the main functions of a luxury brand, including brand creation, the complexity of managing brand identity, the convergence of arts and brands, and much more Addresses the practical functions that can make or break bottom lines and affect brand perception, such as distribution, retailing, logistics, and

licensing Focuses on brand life-cycle, brand identity, and licensing issues A compelling and comprehensive examination of the different dimensions of luxury management in various sectors, this new edition of the classic text on brand management is essential reading for anyone working with or interested in making the most of a luxury brand in the post-recession world.

Srun shows how the psychology of luxury brands truly plays into high value customer motivations and unlocks the potential to understand their decision processes which are unlike that of any other customer. Selling to very wealthy, demanding customers - whether you're selling luxury products or high value bespoke professional services - is a very different process to selling anything else to anyone else. Francis Srun has twenty years experience in the luxury industry, based in France, Switzerland, China and Hong Kong, most recently with Maison Boucheron. The first step is learning how to physically embody "Luxury". You need to look, speak, and move "Luxury". The true luxury attitude is not submissive nor is it hauteur - it is gentle, generous and simply, truly human. Success comes from not just being professional but from building a genuinely luxury relationship with clients. To do that you need to truly understand your client. High value customers today are younger, international in outlook and

residence, and increasingly from Asia. Their buying motivation is always about self-affirmation and pleasure and never about money. The luxury customer's decision process is unlike that of other customers. While emotion is important when selling anything to anyone - with luxury selling it is paramount. Srun shows how the psychology of Brand, Product, Place, Price and Time all play a role in customer's motivations. Finally this book guides you step by step with concrete examples and useful techniques through the seven steps of luxury selling: be prepared to sell, welcome appropriately, listen genuinely, propose and present with style, meet objections with persuasion rather than refutation, conclude sharply and finally gain loyalty for a long term relationship.

Meta-Luxury sets out to define the ultimate meaning of true luxury, exploring it as both a culture and business model. Through the concept of Unique Achievement and the drivers of Craftsmanship, Focus, History and Rarity, the authors examine what is at the heart of true luxury through a unique series of conversations.
