The Modern Watchmakers Lathe & How To Use It by Archie B ...

A standard accessory with a watchmaker's lathe is the wax chuck. I use this type of workholding for a number of different jobs described on this site. I usually use super glue in place of shellac or wax as was the traditional technique. The collet has 5mm threads and various brass arbors can be screwed into place.

The Modern Watchmakers Lathe And How To Use It (2003 ...

There are a number of designs and types of lathe intended for use by watchmakers, some dating back to the late 1700s and including specialised models - for example "fiddle" lathes, "steel turns", Jacot, Swiss, Swiss Universal (also called the English Mandrel) Bottum and Dracip.

List of Watchmakers Lathes

A watchmaker's lathe in use to prepare a decorative watch component cut from copper. A watchmaker is an artisan who makes and repairs watches. Since a majority of watches are now factory made, most modern watchmakers only repair watches. However, originally they were master craftsmen who built watches, including all their parts, by hand.

Watchmaker - Wikipedia

A very beautiful piece of equipment . Looks and feels in very good condition but not been used for 50 years or more ,I changed the plug to modern plug (was an old 5amp round pin plug that was on it) and the motor and variable speed unit work ok .I have taken images of all that comes with the lathe ,sorry I do not know what the bits and pieces are,
