students with everything they need to be successful in the statistics course and on the AP® Exam. With the expert authorship of high school AP® Statistics veterans, Daren Starnes and Josh Tabor and their supporting team of AP® teacher/leaders, *The Practice of Statistics, Sixth edition (TPS6)* has been crafted to follow the topical outline of the AP® Statistics course with careful attention paid to the style, nomenclature, and language used on the AP® Statistics exam. It combines a data analysis approach with the power of technology, innovative pedagogy, and an extensive support program built entirely for the sixth edition. New resources, including a robust online homework program and an extensively revised TestBank, give teachers and students everything they need to realize success on the exam and in the course.

Modern businesses have to deal with a mass of data. What do these data tell us, and how can we use inferences from the data to make better business decisions? *The Practice of Statistics for Business and Economics* is designed to answer these questions by discussing data production and interpretation at the start of the book.

The third edition of *The Basic Practice of Statistics* builds on the strengths of the second: a balanced and modern approach to data analysis, data production, and inference; and an emphasis on clear explanations of ideas rather than formal mathematics or reliance on recipes.
