Business has its turnaround artists; so does warfare. Classical historian Hanson presents five generals who retrieved wars from defeat, three Americans (William Sherman, Matthew Ridgway, and David Petraeus) and two from ancient history (Themistocles of Battle of Salamis fame and Belisarius, briefly the restorer in the 500s of the Roman Empire).

Stirring portraits of five commanders whose dynamic leadership changed the course of war and history.

Victor Davis Hanson has long been acclaimed as one of our leading scholars of ancient history. In recent years he has also become a trenchant voice on current affairs, bringing a historian's deep knowledge of past conflicts to bear on the crises of the present, from 9/11 to Iran. "War," he writes, "is an entirely human enterprise." Ideologies change, technologies develop, new strategies are invented--but human nature is constant across time and space. The dynamics of warfare in the present age still remain comprehensible to us through careful study of the past. Though many have called the War on Terror unprecedented, its contours would have been quite familiar to Themistocles of Athens or William Tecumseh Sherman. And as we face the menace of a bin Laden or a Kim Jong-Il, we can prepare ourselves with knowledge of how such challenges have been met before. *The Father of Us All* brings together much of Hanson's finest writing on war and society, both ancient and modern. The author has gathered a range of essays, and combined and revised them into a richly textured new work that explores such topics as how technology shapes warfare, what constitutes the "American way of war," and why even those who abhor war need to study military history. "War is the father and king of us all," Heraclitus wrote in ancient Greece. And as Victor Davis Hanson shows, it is no less so today.

Examining nine landmark battles from ancient to modern times--from Salamis, where outnumbered Greeks devastated the slave army of Xerxes, to Cortes's conquest of Mexico to the Tet offensive--Victor Davis Hanson explains why the armies of the West have been the most lethal and effective of any fighting forces in the world. Looking beyond popular explanations such as geography or superior technology, Hanson argues that it is in fact Western culture and values--the tradition of dissent, the value placed on inventiveness and adaptation, the concept of citizenship--which have consistently produced superior arms and soldiers.

Offering riveting battle narratives and a balanced perspective that avoids simple triumphalism, *Carnage and Culture* demonstrates how armies cannot be separated from the cultures that produce them and explains why an army produced by a free culture will always have the advantage.

With straightforward advice and informative readings of the great Greek texts, the authors show how we might still save classics and the Greeks for future generations. *Who Killed Homer?* is must reading for anyone who agrees that knowledge of classics acquaints us with the beauty and perils of our own culture.

One of our most provocative military historians, Victor Davis Hanson has given us painstakingly researched and pathbreaking accounts of wars ranging from classical antiquity to the twenty-first century. Now he juxtaposes an ancient conflict with our most urgent modern concerns to create his most engrossing work to date, *A War Like No Other*. Over the course of a generation, the Hellenic city-states of Athens and Sparta fought a bloody conflict that resulted in the collapse of Athens and the end of its golden age. Thucydides wrote the standard history of the Peloponnesian War, which has given readers throughout the ages a vivid and authoritative narrative. But Hanson offers readers something new: a complete chronological account that reflects the political background of the time, the strategic thinking of the combatants, the misery of battle in multifaceted theaters, and important insight into how these events echo in the present. Hanson compellingly portrays the ways Athens and Sparta fought on land and sea, in city and countryside, and details their employment of the full scope of conventional and nonconventional tactics, from sieges to targeted assassinations, torture, and terrorism. He also assesses the crucial roles played by warriors such as Pericles and Lysander, artists, among them Aristophanes, and thinkers including Sophocles and Plato. Hanson's perceptive analysis of events and personalities raises many thought-provoking questions: Were Athens and Sparta like America and Russia, two superpowers battling to the death? Is the Peloponnesian War echoed in the endless, frustrating conflicts of Vietnam, Northern Ireland, and the current Middle East? Or was it more like America's own Civil War, a brutal rift that rent the fabric of a glorious society, or even this century's "red state—blue state" schism between liberals and conservatives, a cultural war that manifestly controls military policies? Hanson daringly brings the facts to life and unearths the often surprising ways in which the past informs the present. Brilliantly researched, dynamically written, *A War Like No Other* is like no other history of this important war.

Investigates three key battles in Western history including the battle of Delium in 424 B.C., the battle at Shiloh during the Civil War, and the battle of Okinawa during World War II, discussing their enduring impact on civilization and on modern warfare belief systems. Reprint. 25,000 first printing.

A tale inspired by the battles of ancient Greek military leader Epaminondas is told through the eyes of a farmer who leaves his home to serve under the general and who is swept up against his better judgment in the fervor to bring democracy to regions oppressed by the Spartans. A first novel by the historian author of *The Father of Us All*. 40,000 first printing.

A definitive account of World War II by America's preeminent military historian.

World War II was the most lethal conflict in human history. Never before had a war been fought on so many diverse landscapes and in so many different ways, from rocket attacks in London to jungle fighting in Burma to armor strikes in Libya. The Second World Wars examines how combat unfolded in the air, at sea, and on land to show how distinct conflicts among disparate combatants coalesced into one interconnected global war. Drawing on 3,000 years of military history, bestselling author Victor Davis Hanson argues that despite its novel industrial barbarity, neither the war's origins nor its geography were unusual. Nor was its ultimate outcome surprising. The Axis powers were well prepared to win limited border conflicts, but once they blundered into global war, they had no hope of victory. An authoritative new history of astonishing breadth, The Second World Wars offers a stunning reinterpretation of history's deadliest conflict.

Part history, part political analysis, and part memoir, Mexifornia is an intensely personal work by one of our most important writers. Victor Davis Hanson, known for his military histories and his social commentary, is a fifth-generation Californian who lives on a family farm in the Central Valley and has written eloquent elegies on the decline of agrarianism, *Fields Without Dreams* and *The Land Was Everything*. Here too, he ponders what has changed in California over the past quarter century, examining how the state and the Southwest more broadly—indeed, the entire nation—have been altered by hemorrhaging borders. Hanson admires the ambition and vigor of immigrants who have helped make California strong, but he indicts the disordered immigration policies that led to the present mess. He also illuminates the ways those policies are harmful to people who have come from Mexico and Central America seeking a better life in the United States. Nearly twenty years after the first publication of *Mexifornia*, Hanson offers an update on the continuing tragedy of illegal immigration. At the same time, he remains hopeful that our traditions of integration, assimilation, and intermarriage may yet remedy a predicament created by politicians and ideologues.

The Greeks of the classical age invented not only the central idea of Western politics--that the power of state should be guided by a majority of its citizens--but also the central act of Western warfare, the decisive infantry battle. Instead of ambush, skirmish, maneuver, or combat between individual heroes, the Greeks of the fifth century b.c. devised a ferocious, brief, and destructive head-on clash between armed men of all ages. In this bold, original study, Victor Davis Hanson shows how this brutal enterprise was dedicated to the same outcome as consensual government--an unequivocal, instant resolution to dispute. The *Western Way of War* draws from an extraordinary range of sources--Greek poetry, drama, and vase painting, as well as historical records--to describe what actually took place on the battlefield. It is the first study to explore the actual mechanics of classical Greek battle from the vantage point of the infantryman--the brutal spear-thrusting, the difficulty of fighting in heavy bronze armor which made it hard to see, hear and move, and the fear. Hanson also discusses the physical condition and age of the men, weaponry, wounds, and morale. This compelling account of what happened on the killing fields of the ancient Greeks ultimately shows that their style of armament and battle was contrived to minimize time and life lost by making the battle experience as decisive and appalling as possible. Linking this new style of fighting to the rise of constitutional government, Hanson raises new
