Essentially, an asset-based business valuation will total up all the investments in the company. Asset-based business valuations can be done in one of two ways: A going concern asset-based approach takes a look at the company's balance sheet, lists the business's total assets, and subtracts its total liabilities. This is also called book value.

Book value is the number shown as "owner's equity" on your balance sheet. Book value is not a very useful number, since the balance sheet reflects historical costs and depreciation of assets rather than their current market value.
