NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • The Economist • The Christian Science Monitor • Bloomberg Businessweek • The Globe and Mail From the bestselling and award-winning author of Paris 1919 comes a masterpiece of narrative nonfiction, a fascinating portrait of Europe from 1900 up to the outbreak of World War I. The century since the end of the Napoleonic wars had been the most peaceful era Europe had known since the fall of the Roman Empire. In the first years of the twentieth century, Europe believed it was marching to a golden, happy, and prosperous future. But instead, complex personalities and rivalries, colonialism and ethnic nationalisms, and shifting alliances helped to bring

about the failure of the long peace and the outbreak of a war that transformed Europe and the world. The War That Ended Peace brings vividly to life the military leaders, politicians, diplomats, bankers, and the extended, interrelated family of crowned heads across Europe who failed to stop the descent into war: in Germany, the mercurial Kaiser Wilhelm II and the chief of the German general staff, Von Moltke the Younger; in Austria-Hungary, Emperor Franz Joseph, a man who tried, through sheer hard work, to stave off the coming chaos in his empire; in Russia, Tsar Nicholas II and his wife; in Britain, King Edward VII, Prime Minister Herbert Asquith, and British admiral Jacky Fisher, the fierce advocate of naval reform who entered into the arms race with Germany that pushed the continent toward confrontation on land and sea. There are the would-be peacemakers as well, among them prophets of the horrors of future wars whose warnings went unheeded: Alfred Nobel, who donated his fortune to the cause of international understanding, and Bertha von Suttner, a writer and activist who was the first woman awarded Nobel ' s new Peace Prize. Here too we meet the urbane and cosmopolitan Count Harry Kessler, who noticed many of the early signs that something was stirring in Europe; the young Winston Churchill, then First Lord of the Admiralty and a rising figure in British politics; Madame Caillaux, who shot a man who might have been a force for peace; and more. With indelible portraits, MacMillan shows how the fateful decisions of a few powerful people changed the course of history. Taut, suspenseful, and impossible to put down, The War That Ended Peace is also a wise cautionary reminder of how wars happen in spite of the near-universal desire to keep the peace. Destined to become a classic in the tradition of Barbara Tuchman ' s The Guns of August, The War That Ended Peace enriches our understanding of one of the defining periods and events of

The First World War followed a period of sustained peace in Europe during which people talked with confidence of prosperity, progress and hope. This title offers the history of the political, cultural, military and personal forces which shaped Europe's path to the Great War.

A landmark work of narrative history, *Paris 1919* is the first full-scale treatment of the Peace Conference in more than twenty-five years. It offers a scintillating view of those dramatic and fateful days when much of the modern world was sketched out, when countries were created—Iraq, Yugoslavia, Israel—whose troubles haunt us still. Winner of the Samuel Johnson Prize • Winner of the PEN Hessel Tiltman Prize • Winner of the Duff Cooper Prize Between January and July 1919, after “ the war to end all wars, ” men and women from around the world converged on Paris to shape the peace. Center stage, for the first time in history, was an American president, Woodrow Wilson, who with his Fourteen Points seemed to promise to so many people the

fulfillment of their dreams. Stern, intransigent, impatient when it came to security concerns and wildly idealistic in his dream of a League of Nations that would resolve all future conflict peacefully, Wilson is only one of the larger-than-life characters who fill the pages of this extraordinary book. David Lloyd George, the gregarious and wily British prime minister, brought Winston Churchill and John Maynard Keynes. Lawrence of Arabia joined the Arab delegation. Ho Chi Minh, a kitchen assistant at the Ritz, submitted a petition for an independent Vietnam. For six months, Paris was effectively the center of the world as the peacemakers carved up bankrupt empires and created new countries. This book brings to life the personalities, ideals, and prejudices of the men who shaped the settlement. They pushed Russia to the sidelines, alienated China, and dismissed the Arabs. They struggled with the problems of Kosovo, of the Kurds, and of a homeland for the Jews. The peacemakers, so it has been said, failed dismally; above all they failed to prevent another war. Margaret MacMillan argues that they have unfairly been made the scapegoats for the mistakes of those who came later. She refutes received ideas about the path from Versailles to World War II and debunks the widely accepted notion that reparations imposed on the Germans were in large part responsible for the Second World War. Praise for Paris 1919 “ It ’ s easy to get into a war, but ending it is a more arduous matter. It was never more so than in 1919, at the Paris Conference. . . . This is an enthralling book: detailed, fair, unfailingly lively. Professor MacMillan has that essential quality of the historian, a narrative gift. ” —Allan Massie, The Daily Telegraph (London)

war on combatants. Utterly lacking in rhetoric or dogma, this manual relies instead on bare fact, frank description, and a spare question-and-answer format. Hedges allows U.S. military documentation of the brutalizing physical and psychological consequences of combat to speak for itself. Hedges poses dozens of questions that young soldiers might ask about combat, and then answers them by quoting from medical and psychological studies. • What are my chances of being wounded or killed if we go to war? • What does it feel like to get shot? • What do artillery shells do to you? • What is the most painful way to get wounded? • Will I be afraid? • What could happen to me in a nuclear attack? • What does it feel like to kill someone? • Can I withstand torture? • What are the long-term consequences of combat stress? • What will happen to my body after I die? This profound and devastating portrayal of the horrors to which we subject our armed forces stands as a ringing indictment of the glorification of war and the concealment of its barbarity.

A vivid social history details the lives of British women "exiled" to India by virtue of their husbands' and fathers' assignments there during the era of British colonial rule, interweaving personal correspondence, interviews, and memoirs to capture a unique society immersed in a culture very different from their own. This professor's great work is possibly the most important book of any sort, probably the most important historical book, certainly the most controversial book to come out of Germany since the war. It had already forced the revision of widely held views in Germany's responsibility for beginning and continuing World War 1, and of supposed divergence of aim between business and the military on one side and labor

and intellectuals on the other.

Part of the CBC Massey Lectures Series In History ' s People internationally acclaimed historian Margaret MacMillan gives her own personal selection of figures of the past, women and men, some famous and some little-known, who stand out for her. Some have changed the course of history and even directed the currents of their times. Others are memorable for being risk-takers, adventurers, or observers. She looks at the concept of leadership through Bismarck and the unification of Germany; William Lyon MacKenzie King and the preservation of the Canadian Federation; Franklin Delano Roosevelt and the bringing of a unified United States into the Second World War. She also notes how leaders can make huge and often destructive mistakes, as in the cases of Hitler, Stalin, and Thatcher. Richard Nixon and Samuel de Champlain are examples of daring risk-takers who stubbornly went their own ways, often in defiance of their own societies. Then there are the dreamers, explorers, and adventurers, individuals like Fanny Parkes and Elizabeth Simcoe who manage to defy or ignore the constraints of their own societies. Finally, there are the observers, such as Babur, the first Mughal emperor of India, and Victor Klemperer, a Holocaust survivor, who kept the notes and diaries that bring the past to life. History ' s People is about the important and complex relationship between biography and history, individuals and their times.

Nearly a century has passed since the assassination of Austria-Hungary's Archduke Ferdinand, yet the repercussions of the devastating global conflict that followed echo still. In this provocative book, historian Ian Beckett turns the spotlight on twelve particular events of the First World War that continue to shape the world today. Focusing

on episodes both well known and scarcely remembered, Beckett tells the story of the Great War from a new perspective, stressing accident as much as strategy, the small as well as the great, the social as well as the military, and the long term as much as the short term. The Making of the First World War is global in scope. The book travels from the deliberately flooded fields of Belgium to the picture palaces of Britain's cinema, from the idealism of Wilson's Washington to the catastrophic German Lys offensive of 1918. While war is itself an agent of change, Beckett shows, the most significant developments occur not only on the battlefields or in the corridors of power, but also in hearts and minds. Nor may the decisive turning points during years of conflict be those that were thought to be so at the time. With its wide reach and unexpected conclusions, this book revises—and expands—our understanding of the legacy of the First World War.

A narrative of the First World War examines the brutal conflict that transformed the face of Europe, paved the way for the Soviet Union and Hitler, and had long lasting repercussions.

‘ No part of the Great War compares in interest with its opening ’ , wrote Churchill. ‘ The measured, silent drawing together of gigantic forces, the uncertainty of their movements and positions, the number of unknown and unknowable facts made the first collision a drama never surpassed...in fact the War was decided in the first twenty days of fighting, and all that happened afterwards consisted in battles which, however formidable and devastating, were but desperate and vain appeals against the decision of fate. ’ On of Britain's foremost military historians and defence experts tackles the origins - and the opening first few weeks

of fighting - of what would become known as 'the war to end all wars'. Intensely researched and convincingly argued, Allan Mallinson explores and explains the grand strategic shift that occurred in the century before the war, the British Army 's regeneration after its drubbings in its fight against the Boer in South Africa, its almost calamitous experience of the first twenty days ' fighting in Flanders to the point at which the British Expeditionary Force - the 'Old Contemptibles' - took up the spade in the middle of September 1914: for it was then that the war changed from one of rapid and brutal movement into the more familiar vision of trench warfare on Western Front. In this vivid, compelling new history, Mallinson brings his experience as a professional soldier to bear on the circumstances, events, actions and individuals and speculates – tantalizingly – on what might have been...
