dynamic field. Organized by theory, this popular text discusses major theorists who represent psychoanalytic, neopsychanalytic, lifespan, trait, humanistic, cognitive, behavioral, and social-learning approaches, while demonstrating the influence of events in theorists' personal and professional lives on the development of these theories. The book also explores the ways in which race, gender, and cultural issues play a part in the study of personality and in personality assessment, and includes numerous examples, tables, and figures that further enhance students' understanding of the content. The final chapter, Personality in Perspective, integrates topics explored in previous chapters and suggests conclusions that can be drawn from the many theorists' work. "What makes people behave as they do? Are people ordinarily aware of what they are doing, or are their behaviors the result of hidden, unconscious motives? Are some people naturally good and others basically evil? Or do all people have potential to be either good or evil? Is human conduct largely a product of nature, or is it shaped mostly by environmental influences? Can people freely choose to mold their personality, or are their lives determined by forces beyond their control? Are people best described by their similarities, or is uniqueness the dominant characteristic of humans? What causes some people to develop disordered personalities whereas others seem to grow toward psychological health? These questions have been asked and debated by philosophers, scholars, and religious thinkers for several thousand years; but most of these discussions were based on personal opinions that were colored by political, economic, religious, and social considerations. Then, near the end of the 19th century, some progress was made in humanity's ability to organize, explain, and predict its own actions. The emergence of psychology as the scientific study of human behavior marked the beginning of a more systematic approach to the study of human personality. This edition continues to emphasize the strong and unique features of earlier editions, namely the overviews near the beginning of each chapter, a lively writing style, the thought-provoking concepts of humanity as seen by each theorist, and the structured evaluations of each theory"--

Presenting coverage of the major theorists who represent different aspects of the approaches to personality, this text also looks at the study of personality theories, suggesting conclusions that can be drawn from many theorists' work.

Thoroughly updated to include the latest research available, THEORIES OF PERSONALITY, 10E takes a unique theory by theory approach that carefully guides students through major theories on their way to a comprehensive understanding of personality. Richard Ryckman's student-friendly writing style offers a straightforward presentation of major theories, helping readers more easily distinguish between them. The text begins by providing a framework that defines personality and emphasizes the science of personality--including the interrelation between research and theory. Next it introduces each major theoretical position with an objective overview of the theorist's basic concepts and principles. It concludes by noting the ways in which the different theories stimulate additional research efforts and by presenting five current research trends resulting from the work of these earlier theorists. The result is a text that merges the best of classic

"The respected and recognized best seller in the market, Jerry Burger's PERSONALITY is a solid mid-level book that fuses the best of theory-based and research-based instruction to give students an illuminating introduction to the subject. Burger pairs "theory, application, and assessment" chapters with chapters that describe the research programs aligned with every major theoretical approach. Biographical sketches of theorists and accounts of the stories behind influential research programs help students understand how classic and contemporary findings relate to each other, and reinforce the idea that theory and research perpetuate one another. In-book self-assessments promote students' interaction with the material." -- publisher website.

The 8th edition of Theories of Personality follows in the tradition of the previous versions, by centering on the premise that personality theories are a reflection of the unique cultural background, family experiences, personalities, and professional training of their originators. The book begins by acquainting students with the meaning of personality and providing them with a solid foundation for understanding the nature of theory, as well as its crucial contributions to science. The chapters that follow present twenty-three major theories: coverage of each theory also encompasses a biographical sketch of each theorist, related research, and applications to real life. Changes in the 8th edition included a new chapter 8 on evolutionary personality theory, focusing on the work of David Buss. The Related Research sections in each chapter have also been updated.
