Thiel speakers are known for excellent bass, but the CS7.2 was even better than I'd expected. From the
mid-20Hz range on up, it was fast, clean, powerful, and very natural—in other words, dead on. Detail
was excellent, as was the recovery of ambience and spatial cues.

From Nixon to Clinton, Watergate to Whitewater, few Americans have observed the ups and downs of
presidential leadership more closely over the past thirty years than David Gergen. A White House

adviser to four presidents, both Republican and Democrat, he offers a vivid, behind-the-scenes account of their struggles to exercise power and draws from them key lessons for leaders of the future. Gergen begins *Eyewitness to Power* with his reminiscence of being the thirty-year-old chief of the White House speechwriting team under Richard Nixon, a young man at the center of the Watergate storm. He analyzes what made Nixon strong -- and then brought him crashing down: Why Nixon was the best global strategist among recent presidents. How others may gain his strategic sense. How Nixon allowed his presidency to spin out of control. Why the demons within destroyed him. What lessons there are in Nixon's disaster. Gergen recounts how President Ford recruited him to help shore up his White House as special counsel. Here Gergen considers: Why Ford is one of our most underrated presidents. Why his pardon of Nixon was right on the merits but was so mishandled that it cost him his presidency. Even in his brief tenure, Ford offers lessons of leadership for others, as Gergen explains. Though Gergen had worked in two campaigns against him, Ronald Reagan called him back to the White House again, where he served as the Gipper's first director of communications. Here he describes: How Reagan succeeded where others have failed. Why his temperament was more important than his intelligence. How he mastered relations with Congress and the press. The secrets of "the Great Communicator" and why his speeches were the most effective since those of John Kennedy and Franklin Roosevelt. In 1993, Bill Clinton surprised Gergen -- and the political world -- when he recruited the veteran of Republican White Houses to join him as counselor after his early stumbles. Gergen reveals: Why Clinton could have been one of our best presidents but fell short. How the Bill-and-Hillary seesaw rocked the White House. How failures to understand the past brought Ken Starr to the door. Why the new ways in which leadership was developed by the Clinton White House hold out hope, and what dangers they threaten. As the twenty-first century opens, Gergen argues, a new golden age may be dawning in America, but its realization will depend heavily upon the success of a new generation at the top. Drawing upon all his many experiences in the White House, he offers seven key lessons for leaders of the future. What they must have, he says, are: inner mastery; a central, compelling purpose rooted in moral values; a capacity to persuade; skills in working within the system; a fast start; a strong, effective team; and a passion that inspires others to keep the flame alive. *Eyewitness to Power* is a down-to-earth, authoritative guide to leadership in the tradition of Richard Neustadt's *Presidential Power and the Modern Presidents*.

A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

A supplementary publication which provides additional locations of titles included in earlier issues of the catalog.

Minimally Invasive Gynecologic Surgery provides a complete, practical and timely review of the minimally invasive surgical techniques used to treat gynaecologic diseases and conditions. This book describes the full range of minimally invasive procedures in current gynaecologic practice, with discussion of the indications and contraindications and a summary of available evidence.

Mendoza the Jew combines a graphic history with primary documentation and contextual information to explore issues of nationalism, identity, culture, and historical methodology through the life story of Daniel Mendoza. Mendoza was a poor Sephardic Jew from East London who became the boxing champion of Britain in 1789. As a Jew with limited means and a foreign-sounding name, Mendoza was an unlikely symbol of what many Britons considered to be their very own "national" sport.

It took eight years to record Wagner's 'Ring' for the first time. The recording producer tells the story of how this grew from a wild, imaginative idea into a mammoth project, moving through crisis and chaos to triumph. He also talks about the Vienna Philharmonic Orchestra and the great singers who were involved in the project.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
