Nature has been a key attraction factor for tourism in the Nordic countries for decades. The demand for nature-based tourism has steadily grown and is one of the most rapidly expanding sectors within tourism across Europe and elsewhere. This demand has created opportunities for nature-based tourism to develop as an economic diversification tool within regions rich in natural amenities. But nature-based tourism is not only about tourism businesses and tourists visiting nature. The natural environment as a basis for tourism involves many challenges related to local communities, public access, nature protection and the management of natural resources. This book covers a broad set of topics in contemporary nature-based tourism from Finland, Iceland, Norway and Sweden. Areas discussed are innovation, fishing rights and supply of angling, recreation experience preferences, national park attractions, the cultural clash between established outdoor recreational use and new tourism activities, the Right of Public Access as opportunity and obstacle, preferences of tourism landscapes, controversies around wilderness development, management of hiking trails, eco-tourism certification, and financing of recreational infrastructure. This book was published as a special issue of the Scandinavian Journal of Hospitality and Tourism.

The notion of "mobilities," when looked at from a practical point of view, turns out to cover different kinds of human activity. It is not surprising, then, that when approached from an academic perspective, it reveals enormous potential for interdisciplinary research, which has proven extremely attractive to many scholars from different continents, disciplines, and schools of academic inquiry. The scholars in this volume focus on the specific aspects of mobilities, namely, tourism and travel behavior, but approach them from a plethora of positions. Such a myriad of perspectives is bound to be challenging in methodological terms, but it seems there is a growing agreement as to the worthiness of this interdisciplinary research. By means of combining various approaches, researchers obtain access to a fascinating and increasingly ubiquitous phenomenon of contemporary human mobility.

Presents answers to the following questions: how do tourists go about seeking high novelty and yet return to the same destination? How do some firms in the same industry end up embracing industrial tourism while other firms reject such business models? How do executive leadership styles affect employee satisfaction in international tourist hotels?
