Engineer Field Data

Larry Grodsky devoted his life to motorcycle safety. Through the riding courses he taught and his "Stayin' Safe" columns in Rider magazine (from 1988 until his untimely death in 2006), he helped thousands of motorcyclists improve their skills and their ability to ride really well. This collection of Grodsky's columns reveals his ability to illuminate complex and sometimes highly technical subjects with an entertaining and personal style, spiced with his trademark wry wit and keen observations of human behavior. A master teacher, Grodsky was constantly learning from his students, always striving to find the best way to lead riders towards the mastery of their two-wheeled vehicles. Many of his columns focus on helping riders develop specific skills (complete with practice exercises), while others deal with the riding environment and riders' mental processes. Although it is packed with information useful to both novice and experienced motorcyclists, this book is not structured as a how-to guide to motorcycle proficiency. Rather, it is a collection of thoughtful essays to be read and savored individually. Readers will be rewarded by the beautifully written stories of a great motorcycle riding instructor who has left his mark on a generation of grateful riders.

Engineer Field Data is designed as an authoritative reference for the military engineer. It covers everything from concreting to improvised munitions!

At their best park, recreation, and tourism organisations can change the world for the better. They can be powerful forces for community revitalisation, environmental and historical education, fitness, connectedness with nature, and much more. But this great potential can only be realised by strong, effective organisations. High Performance Agencies is about the skills and approaches that can lead these organisations to reach their full potential, grow, thrive, and in the process make their communities better places. Because of the technological, demographical, economical, and political changes in society, the old ways of organisational management need to be retooled for the more dynamic environment. This book is written to be used as both a university text for management and administration of park, recreation, and tourism organisations, as well as a guide for practitioners in the field.

9/11. Tomadoes.

Emergency preparedness. Whether explaining parts per million to a community exposed to contaminated groundwater or launching a campaign to encourage home carbon monoxide testing, an effective message is paramount to the desired result: an increased understanding of health risk. Communicating Environmental Risk in Multiethnic Communities is the first book to address the theory and practice of disseminating disaster warnings and hazard education messages to multiethnic communities. Authors Michael K. Lindell and Ronald W. Perry introduce theory-based reasoning as a basis for understanding warning dissemination and public education, devoting specific attention to the community context of emergency warning delivery and response. Through these principles of human behavior, readers can apply risk communication information to virtually any specific disaster agent with which they may be concerned. This volume is recommended for practitioners in private emergency management and federal, state, and local governments, as well as students studying risk communication, health communication, emergency management, and environmental policy and management.

A step-by-step guide to building an electric motorcycle from the ground up Written by alternative fuel expert Carl Vogel, this hands-on guide gives you the latest technical information and easy-to-follow instructions for building a two-wheeled electric vehicle--from a streamlined scooter to a full-sized motorcycle. Build Your Own Electric Motorcycle puts you in hog heaven when it comes to hitting the road on a reliable, economical, and environmentally friendly bike. Inside, you'll find complete details on every component, including motor, batteries, and frame. The book covers electric motorcycles currently on themarket and explains how to convert an existing vehicle. Pictures, diagrams, charts, and graphs illustrate each step along the way. Whether you want to get around town on a sleek ride or cruise the super slab on a tricked-out chopper, this is the book for you. Build Your Own Electric Motorcycle covers: Energy savings and environmental benefits Rake, trail, and fork angle Frame and design Batteries and chargers DC and AC motor types Motor controllers Accessories and converters Electrical system and wiring Conversion process Safety, maintenance, and troubleshooting

While feminists have long recognised the importance of self-managed, alternative media to transport their messages, to challenge the status quo, and to spin novel social processes, this topic has been an under-researched area. Hence, this book explores the processes of women's and feminist media production in the context of participatory spaces, technology, and cultural citizenship. The collection is composed of theoretical analyses and critical case studies. It highlights contemporary alternative feminist media in general as well as blogs, zines, culture jamming, and street art.

Solomon Northup was born a free black man. He was kidnapped, tortured, and sold into slavery. For 12 years, he was kept in bondage as a slave in Louisiana--Twelve Years a Slave is his moving and raw account of survival and life as a slave. This edition includes the full book as well as a comprehensive companion with historical notes, character overview, themes overview, and chapter summaries.

The Blackwall frigates form a connecting link between the lordly East Indiaman of the Honourable John Company and the magnificent P and O liners of the present day. They were first-class ships. Well-run, happy ships, and the sailor who started his sea life as a midshipman aboard a Blackwaller looked back ever afterwards to his cadet days as the happiest period of his career. If discipline was strict, it was also just. The training was superb, as witness the number of Blackwall midshipmen who reached the head of their profession and distinguished themselves later in other walks of life. Fifty years ago, the lithographs of the celebrated Blackwall liners to India and Australia could be bought at any seaport for a few shillings. Nowadays, those old ship portraits are cagerly snapped up by a growing group of collectors. We therefore hope that the illustrations in this book will be appreciated.

In 1970, John Kowalski is one of many young, naive teenage soldiers sent to Vietnam to fight in an unpopular war. Dubbed "Cherries" by their more seasoned peers, these newbies suddenly found themselves thrust into the middle of a terrible nightmare - literally forced to become men overnight. On-the-job-training is intense, however, most of these teenagers were hardly ready to absorb the harsh mental, emotional, and physical stress of war. When coming under enemy fire for the first time and witnessing death first-hand, a life changing transition begins...one that can't be reversed. The author is an excellent story teller, readers testify that they are right there with the characters, joining them in their quest for survival, sharing the fear, awe, drama, and sorrow, witnessing bravery and sometimes, even laughing at their humor. It's a story that is hard to put down. When soldiers return home from war, all are different - changed for life. "Cherries" tells it like it is and when finished, readers will better understand what these young men had to endure, and why change is imminent.
