If you want to change the curve number, turn the ignition on, (don't start the engine) and remove the cap – you will see the led light flashing. If the led light doesn't flash, crank the engine a little bit until the led light flashes. Select with the help of a small Philips screw driver, the right curve. Download PDF

This all goes to prove what I've been banging on about for years - the A-Series is not an rpm monster, so should be tuned accordingly. And an engine built to give best power at 6,500-7,000rpm on the road is a waste and unnecessary. Good torque over a wide rpm band means big fun on the road. You really ought to drive this motor!
