"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

Algebra Review serves as a background supplement to Howard Anton and Bernard Kolman's books on finite mathematics—Applied Finite Mathematics and Applied Finite Mathematics with Calculus. This book discusses the number systems of algebra, algebraic notation, exponents and radicals, and fractional exponents. The polynomials and factoring, binomial theorem, and rational expressions are also elaborated. This text covers equations such as linear equations, quadratic equations, and higher degree equations. The Cartesian coordinate system, graphing equations in two variables, and some special functions are likewise deliberated. This publication is a good source for mathematicians and students interested in finite mathematics and how to perform algebraic manipulations.

"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

This is a supplement book with main course book. the book is full of Maths activities for classes I to V. Efforts have been made to present questions in all possible forms.

This book is designed to help teachers implement the power of TI-nspire (Touchpad version) in the teaching of Algebra I. Keying sequences are provided with step-by-step instruction. Worked examples and comprehensive exercise sets with complete solutions are provided. Screen displays enable students to connect their work on the handheld to examples in the text. This book exposes students to multiple representations of concepts using numerous experiences with graphs, spreadsheets and calculator commands to solve real-world problems. Together with its sequel, Algebra I with TI-nspire: Semester 2 these books provide a full program in Algebra I as defined by the new Common Core State Standards for Mathematics.
