Among the greatest challenges of the twenty-first century is that of providing adequate educational opportunities to all citizens of the globe. This anthology – a tribute to the life and work of the Nigerian educationist Michael A. Omolewa – discusses the educational dimensions of social justice, reviews approaches to widening access, analyzes case studies from around the world, and considers future directions in education policy and research.

The report contains the description of the MAD/I language and user's guide for MAD/I in MTS (Michigan Terminal System). The pre-defined MAD/I language, described in the report, is a procedure-oriented algebraic language designed for general-purpose use. It is styled after such languages as ALGOL 60, MAD, and PL/I. MAD/I is also intended as a convenient 'base' language for extension by a definitional facility. The language anticipates the definition (or re-definition) of: data types and structures, statements, operators and operations. The definitional facility itself is not described. The user's guide shows how to compile and run MAD/I programs in MTS. Sample runs are included. There is also a description of a compiler feature which allows assembler code for the IBM 360 to be compiled within a MAD/I program.
