Companion volume to the author's: Transdisciplinary play-based assessment (TPBA2) and Administration guide for TPBA2 & TPBI2.

The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

This book explores the experiences of Indigenous children and young adults around the world as they navigate the formal education system and wider society. Profiling a range of different communities and sociolinguistic contexts, this book examines the language ecologies of their local communities, schools and wider society and the approaches taken by these communities to maintain children's home languages. The authors examine such complex themes as curriculum, translanguaging, contact languages and language use as cultural practice. In doing so, this edited collection acts as a first step towards developing solutions which address the complexity of the issues facing these children and young people. It will appeal to students and scholars of sociolinguistics, applied linguistics and community development, as well as language professionals including teachers, curriculum developers, language planners and educators.

Focused Portfolios offers an innovative method to accurately document children's growth and development by observing them in the midst of their everyday activities. Used for years in programs across the country, this easy-to-use system has recently been updated to reflect current best practices in observation and assessment using portfolios, include information on apps and other digital tools to create portfolios for individual assessment and parent engagement, and incorporates individual state standards to develop portfolios that reflect the child's performance.

FDCRS consists of 32 items, organized under six major headings: Space and Furnishings for Care and Learning -- Basic Care -- Language and Reasoning -- Learning Activities -- Social Development -- Adult Needs. Eight additional items are included for rating a day care home's provisions for special-needs children. Each book contains one score sheet. Packages of 30 score sheets can be ordered separately.

### PMSTAR RED CAR TRIP A

The Creative Curriculum comes alive! This videotape-winner of the 1989 Silver Apple Award at the National Educational Film and Video Festival-demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will find the video an indispensable tool for explainin appropriate practice.

Janice J. Beaty's best-selling *Observing Development of the Young Child* teaches its audience how to observe, record, and interpret the

development of children ages three through five by utilizing a unique checklist to document each aspect of development. This proven resource discusses what these young children are like, and how to support them in their early development with exciting hands-on activities. Even though the new edition has undergone quite an extensive revision, long-time adoptees and fans of the book in its previous editions can rest assured that the author has preserved many of the original features while adapting them to new circumstances of today's early childhood education environment, the key issues, and new research. Streamlined from previous editions, with 12 chapters instead of 14, this practical, easy-to-use system is based on a progression of children's skill development in six major areas: emotional, social, physical, cognitive, language, and creative. Used successfully in early childhood programs all over the country since its inception, this unique and mainstay text looks at child development versus child behaviors, preparing its readers to become avid observers, recording what he/she sees, mastering how to interpret the data, and becoming adept at how to use the observations to plan for the young individuals they will encounter.
