In this part of our WordPress tutorial, you will learn two different ways to install WordPress. Before proceeding with WordPress installation, you need to decide on how you want to access your website. Do you want WordPress on your domain name root (example.com), subfolder (example.com/blog) or subdomain name (blog.example.com)? Only if you want to setup WordPress on a subdomain name, you will have to take an additional step and create a subdomain name.
